PROFILE SUMMARY

Software developer with a strong interest in building scalable and reliable systems. Experienced in turning ideas into products through end-to-end application development and microservices, with a focus on performance and practical user needs.

SKILLS

Programming: JavaScript (ES6+), TypeScript

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Material UI

Backend: Node.js, Express.js, REST APIs, GraphQL, JWT Authentication, Socket.IO

Architecture: Microservices, Event-Driven Architecture, Repository Pattern, Clean Architecture, System Design

Databases: MongoDB, PostgreSQL, Redis, Elasticsearch, Firebase

Cloud & DevOps: Docker, AWS (EC2, S3, SSM), CI/CD (GitHub Actions), Nginx

Monitoring: Prometheus, Grafana, Loki, Winston

Integrations: Razorpay, Google Maps API, WhatsApp Cloud API, Google Gemini AI, Cloudinary

Tools: Git, GitHub, npm, Turborepo

PROJECTS

Orbix (AI-Powered Car Dealership Management Platform)

[Live Link](#) - [GitHub](#)

A **multi-tenant SaaS platform** for car dealerships featuring a **WhatsApp-integrated sales bot**, **subscription billing**, and **real-time inventory management** across multiple showrooms.

Tech stack: Node.js, Express, TypeScript, React, MongoDB, PostgreSQL, Redis, RabbitMQ, Elasticsearch, Socket.IO, TailwindCSS, Docker, Turborepo, Prometheus, Grafana, Loki

- Architected a **7-service microservices backend** using npm + Turborepo monorepo
- Built a **WhatsApp bot** for inventory browsing, test drive booking, and appointments
- Implemented **CQRS** with **Elasticsearch** for scalable inventory search
- Designed **polyglot persistence** using MongoDB, PostgreSQL, and Redis
- Developed **event-driven workflows** using RabbitMQ
- Integrated **observability** using Prometheus, Grafana, and Loki

NatureStay (Full-Stack Travel Booking Platform)

[Live Link](#) - [Live Link](#) - [GitHub](#)

A **multi-portal travel platform** for customers, partners, and admins enabling **package discovery**, **property management**, and **real-time bookings** with **KYC onboarding**.

Tech stack: Node.js, TypeScript, Next.js, React, MongoDB, Redis, Socket.IO, AWS, Razorpay, Gemini AI, Docker

- Built a **layered backend** with **20+ services** using DI and repository pattern
- Developed **AI-based KYC pipeline** using Gemini for Aadhaar data extraction
- Implemented **multi-role authentication** with JWT, OTP verification, and admin 2FA
- Integrated **Razorpay** with real-time booking updates via Socket.IO
- Deployed on **AWS** with Docker and **CI/CD pipelines** using GitHub Actions

LetzGo – (Real-Time Ride-Hailing Ecosystem)

[Live Link](#) - [GitHub](#)

A **multi-tenant ride-hailing platform** for users, captains, and admins with **real-time ride matching**.

Tech stack: React, Node.js, Express, MongoDB, Socket.IO, Google Maps API, Razorpay, Tailwind CSS

- Built a **multi-tenant transportation platform** with role-based access
- Developed **real-time ride matching** and live trip updates using Socket.IO
- Integrated **Google Maps APIs** for routing, distance calculation, and fare estimation
- Implemented **secure authentication** using JWT, OTP verification, and token blacklisting
- Created an **admin dashboard** with real-time analytics and revenue tracking

MINI PROJECTS

Battery Monitor – Real-Time Device Health System

[Live Link](#)

Built a real-time battery monitoring tool using the Web Battery API with custom alerts, LocalStorage persistence, and optimized UI performance. **Tech:** React, Vite, JavaScript, CSS

CWN – Creator Portfolio Website

[Live Link](#)

Developed a responsive React portfolio with an auto-play video gallery, media filtering, and optimized delivery using Cloudinary.

Tech: React, Vite, Framer Motion, Cloudinary

QuickTrade – C2C E-Commerce Marketplace

[Live Link](#)

Built a real-time marketplace with Firebase Firestore, secure authentication, and Cloudinary-based image management.

Tech: React, Vite, Firebase, Cloudinary

CineFlix – Video Streaming Discovery Platform

[Live Link](#)

Created a movie discovery app with Firebase auth, TMDB API integration, and a Netflix-style UI with embedded trailers.

Tech: React, Firebase, TMDB API, Vite

PROFESSIONAL EXPERIENCE

Professional Training – Full Stack Development (MERN Stack) - Prototype [Certificate](#) Jan 2025 – Apr 2026

- Built and deployed multiple production-grade applications including SaaS platforms and real-time systems
- Designed and developed scalable backend systems using Node.js, Express, and TypeScript
- Implemented real-time features, authentication systems, payment integrations, and third-party APIs
- Worked with microservices, event-driven communication, and distributed system concepts in hands-on projects
- Strengthened skills in debugging, performance optimization, writing maintainable production-ready code, and professional communication

Web Development Intern – InvenTeron Technologies

Aug 2023 – Sep 2023

- Developed and maintained web application features using modern frontend and backend technologies
- Assisted in building responsive UI components and integrating REST APIs

Data Analytics Trainee – Trainity

Nov 2022 – Jan 2023

- Completed an intensive analytics program covering data analysis, visualization, and real-world case studies
- Worked on datasets to derive insights and build data-driven solutions

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science and Engineering

2020 – 2024

KLS Vishwanathrao Deshpande Institute of Technology

Haliyal, Karnataka

CGPA: 7 / 10

LANGUAGES

English | Hindi | Kannada
